Create a table with an array column

use trendytech;

create table author_details(author_name string, book_names array<string>) row format delimited fields terminated by ',' collection items terminated by ":";

```
[cloudera@quickstart Downloads]$ gedit authors.csv
[cloudera@quickstart Downloads]$ cat authors.csv
Salman Rushide, Grimus: Shame: Fury
Thomas Otway, Don Carlos: The Orphan
Ben Jonson, Volpone: Epicene
John Milton, Arcades: Comus
[cloudera@quickstart Downloads]$
```

load data local inpath '/home/cloudera/Downloads/authors.csv' into table author_details;

select * from author details;

Screenshot of previous commands

```
hive> use trendytech;
Time taken: 0.015 seconds
hive> create table author details(author name string, book names array<string>)
format delimited fields terminated by ',' collection items terminated by ':';
Time taken: 0.205 seconds
hive> load data local inpath '/home/cloudera/Downloads/authors.csv' into table auth
or details:
Loading data to table trendytech author details
Table trendytech.author details stats: [numFiles=1, totalSize=121]
Time taken: 0.423 seconds
hive> select * from author details;
Salman Rushide ["Grimus", "Shame", "Fury"]
Thomas Otway ["Don Carlos", "The Orphan"]
Ben Jonson
               ["Volpone", "Epicene"]
               ["Arcades", "Comus"]
John Milton
Time taken: 0.057 seconds, Fetched: 4 row(s)
hive>
```

Use explode on array column type

describe author_details;

select explode(book_names) from author_details;

```
hive> describe author details;
0K
author name
                        string
book names
                        array<string>
Time taken: 0.076 seconds, Fetched: 2 row(s)
hive> select explode(book names) from author details;
0K
Grimus
Shame
Don Carlos
The Orphan
Volpone
Epicene
Arcades
Comus
Time taken: 0.054 seconds, Fetched: 9 row(s)
hive>
```

Try selecting other columns with exploded ones

select author_name, explode(book_names) from author_details; (note: this will error out)

Then what's the solution?

Answer: we need to use a lateral view. The exploded column should be made as virtual table and should be joined with actual table.

select author_name, b_name from author_details lateral view explode(book_names) book_table as b_name;

```
hive> describe author details;
author name
                         array<string>
Time taken: 0.071 seconds, Fetched: 2 row(s)
hive> select author name, b name from author details lateral view explode(book name
s) book table as b name;
                Grimus
                Shame
                Don Carlos
                The Orphan
                Volpone
                Epicene
John Milton
                Arcades
                Comus
Time taken: 0.053 seconds, Fetched: 9 row(s)
hive>
```

We have learnt explode & lateral View

Happy Learning!!!
